

Package Details & Key Components

1. Self-Scouting & Internal Analysis

- Tendency Identification – Recognizing patterns in play-calling that may become predictable to opponents.
 - *Example:* If a team runs the ball nearly every time on 3rd & 3, opposing defenses may anticipate and adjust accordingly.
- Broad Analytical Insights – Applying well-established analytics to decision-making.
 - *Example:* Passing on 2nd & 10 has shown to be highly beneficial, but certain field position situations may call for adjustments.
- Refined Situational Analysis – Identifying *when* and *where* these strategies should be implemented for maximum effectiveness.

2. League-Wide Trend Comparison

- Benchmarking Against the Division & League – Analyzing how a team compares to broader league trends.
- Coaching Insight Prompt – Encouraging reflection: *Why is our team different from the rest of the league? Are we ahead of trends or falling behind?*
- Division & League Statistics – Providing context to understand unique tendencies versus broader performance standards.

3. Efficiency Maximization

- Identifying inefficiencies in play-calling:
 - *What are we doing too often that isn't working?*
 - *What are we succeeding at but not using enough?*
- Adjusting strategies to lean into strengths and correct inefficiencies.

4. Opponent Scouting & Game Preparation

- Opponent Data Analysis – Utilizing data to break down opposing team tendencies.
 - *Example:* Identifying how frequently a team blitzes, where they are strongest/weakest, and situational tendencies.
- Drive Efficiency Analysis – Studying the correlation between opening play calls and drive success.
 - *Example:* How does starting a drive with a run vs. a pass impact touchdown percentage?
 - Expanding analysis to sequences such as RPP, PP, P, RR, RRP, etc.
- Comparative Metrics – Comparing findings to FCS/division-wide trends for a broader strategic perspective.
- Special Teams Impact – Evaluating the importance of starting field position in scoring probability.

5. Weekly Reports & Visual Design

- Weekly vs. Overall Performance Tracking – Helping coaches identify what went wrong, what worked, and what needs adjustment.
- Practical Insights for Coaches' Meetings – Highlighting key focus areas for weekly preparation.
- Optimized Presentation for Sideline Use –
 - A concise, one-page double-sided analytics sheet with essential takeaways.
 - Easily accessible for real-time decision-making.
 - Key data points, including Go-for-2 and 4th-down recommendations, presented in a clear, actionable format.
